

# Faces in Beer Developer Recipe

## Black and White Film Beer Developer

### You'll Need

600 ml of beer

50 grams washing soda\*

12 grams of ascorbic acid (powered vitamin C)

### Directions

Heat 600ml of beer to 90°f.

Mix in 50 grams washing soda\* and whisk until dissolved.

Stir in 12 grams of ascorbic acid (powered vitamin C) and mix until dissolved.

Develop at 68°f for 20 minutes. Agitate for the first minute, then again for 15 seconds at the top of each remaining minute.

Wash and fix per the film's instructions.

\*Washing soda is not the same as baking soda. Don't have washing soda? You can make it by heating baking soda to 400°f for 30 mins.
